

SYNERGY

February 27, 2008

I am very pleased to write a letter of recommendation for Bradnic Builders.

Synergy first engaged Bradnic in 2004 to do a reasonably small project – remodeling and refurbishing our offices. The project was done in an extremely professional manner, and was completed on time and under our budget. Since that time, we have utilized Bradnic on several other projects as our company has continued to expand. In nearly every case we have gone out for at least two other bids and we consistently find Bradnic's quotes to be the most reasonable. More importantly, the work continues to be done as promised.

We have just recently awarded business to Bradnic for two more jobs here. Both include general contracting for all work associated with two significant plant and equipment upgrades. Included in the scope of work is site prep, electrical, process piping, HVAC, etc. We awarded both of these jobs to Bradnic because of our confidence in their ability to deliver quality work in the time frame that our business requires.

I would be happy to speak directly with anyone who is interested in more specifics regarding Bradnic's performance.

Sincerely,

Roderick W. Sowders
President & CEO
